Sensory Science ~ Food + Consumer Perception

Sensory food research aims to reach a better understanding of how the senses respond to food and eating, but also how our senses can be used in quality control and product design. - WUR

```
dplyr::summarise(me_with_r)
```

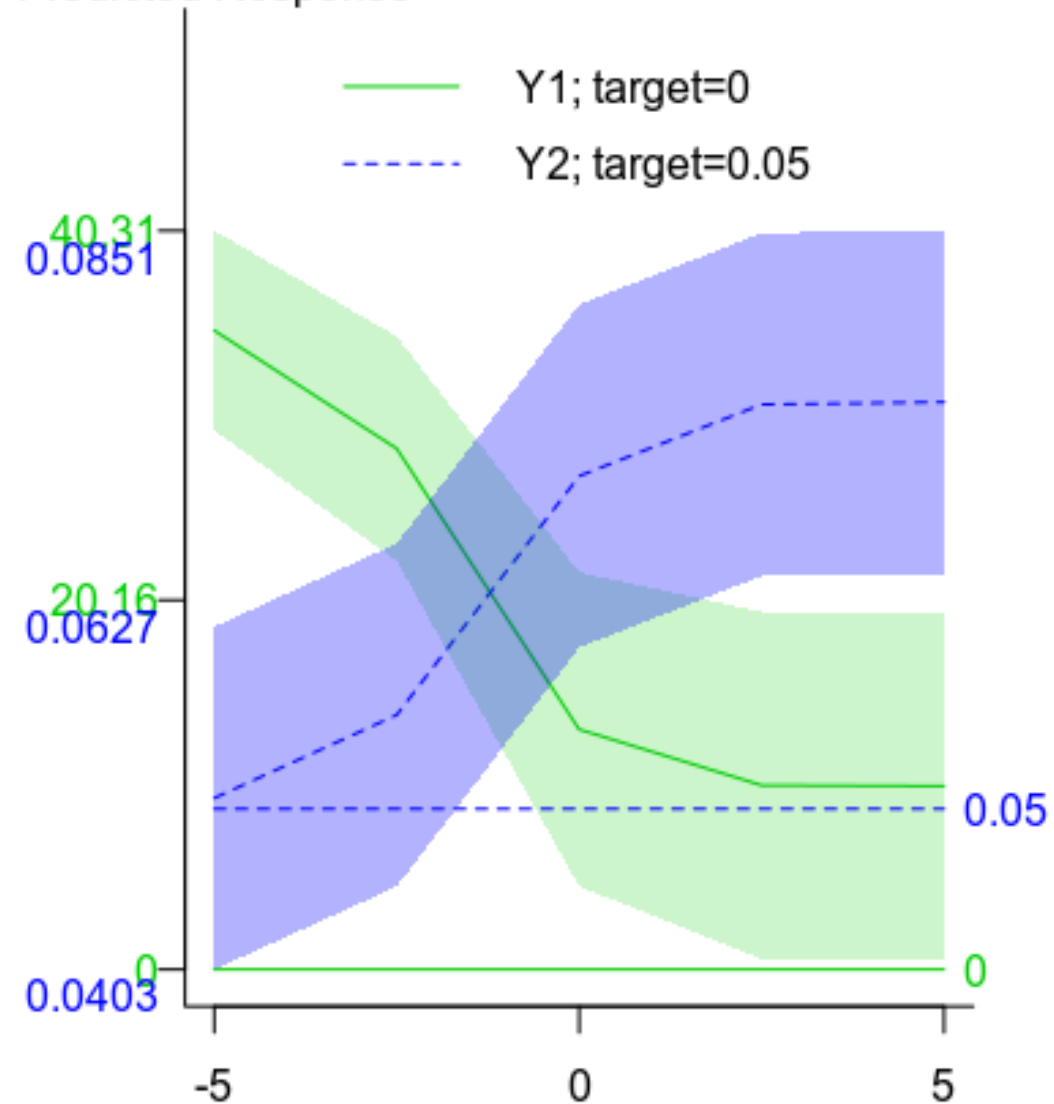

Parameter Setting

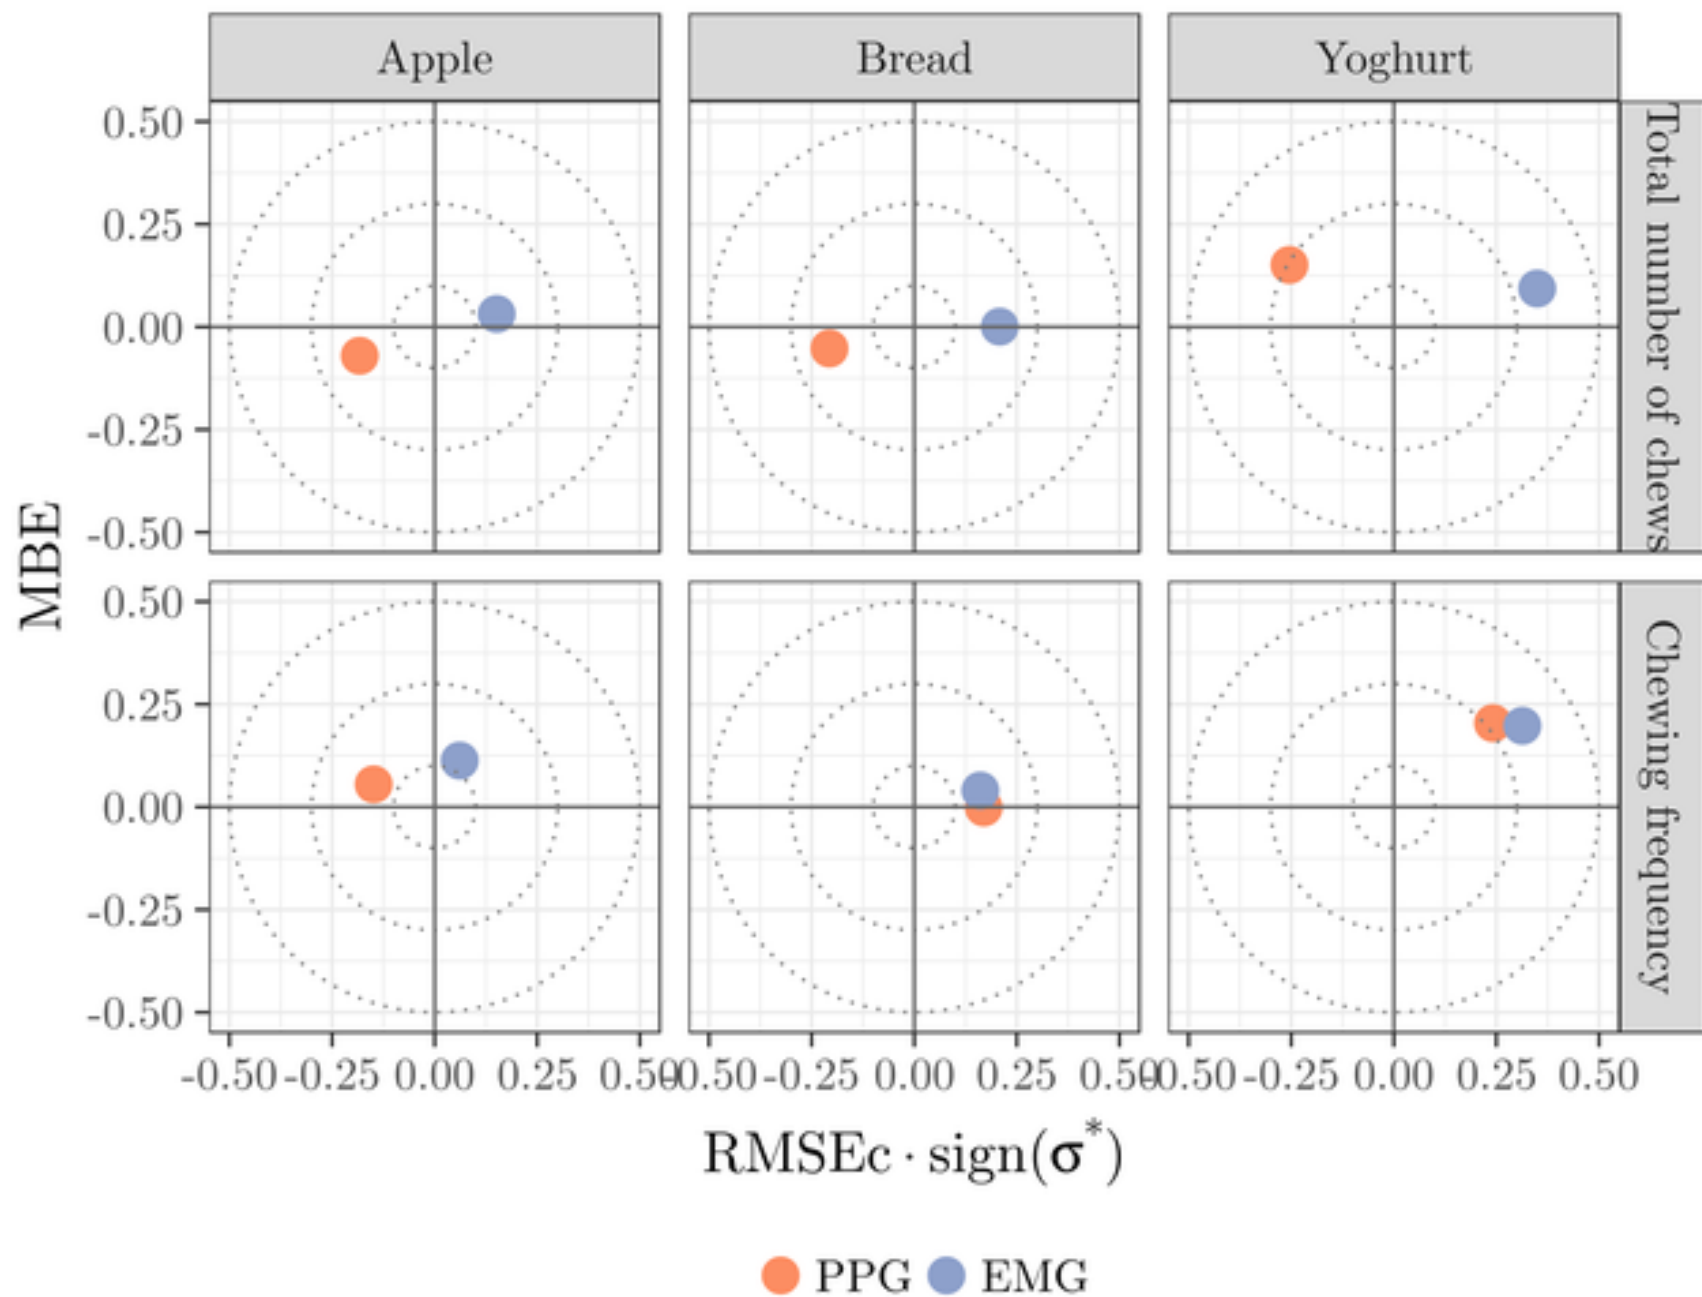

Stretch Vector

Predicted Response

Stretch Vector

Uji Diskriminasi

Jumlah Jawaban Benar

76

Jumlah Percobaan

100

Metode

- ☐ 2-AFC
- ☐ 3-AFC
- ☐ Duo-Trio
- ☒ Triangle
- ☐ Tetrad
- ☐ Hexad
- ☐ Two-out-of-Five

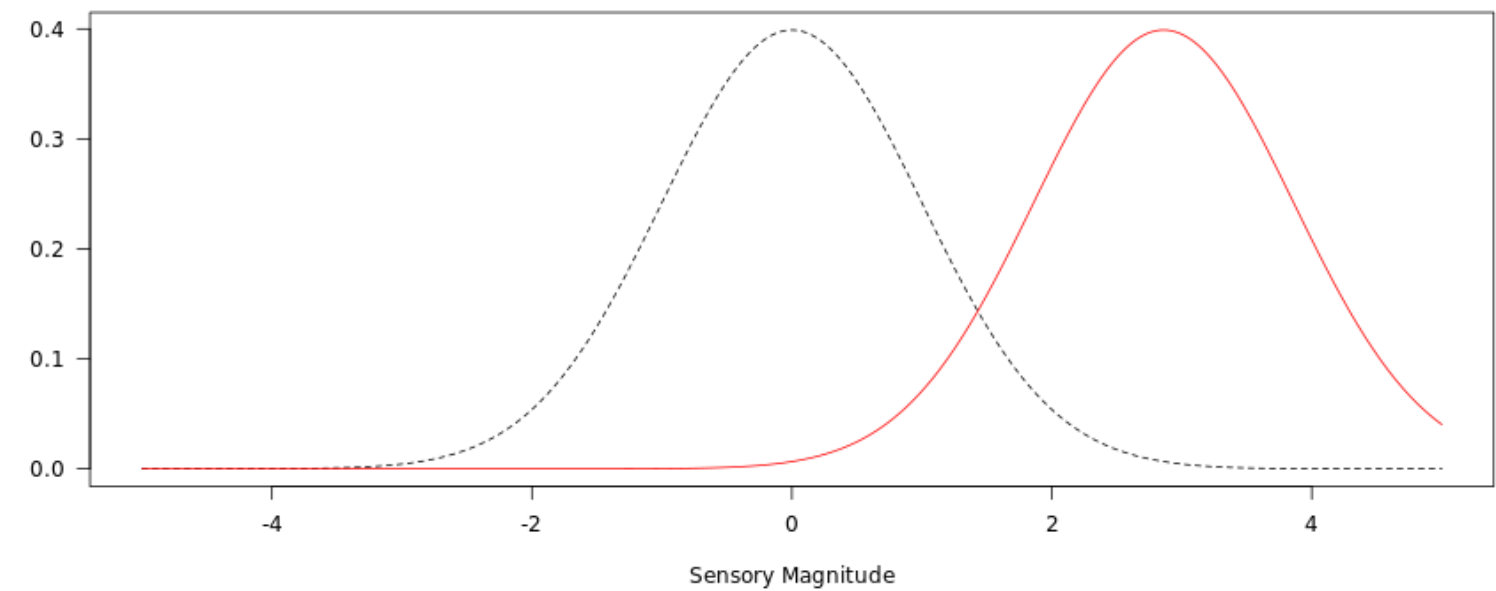

Analisis

Estimat untuk uji Triangle dengan 76 jawaban benar dari total 100 percobaan

	Estimat	Std. Error	95%CI bawah	95%CI atas
Probabilitas Jawaban Benar (pc)	0.76	0.04	0.66	0.84
Proporsi Diskriminator (pd)	0.64	0.06	0.50	0.76
d-prime	2.86	0.27	2.31	3.43

Hasil uji diskriminasi:
'exact' binomial test: p-value = 0
Hipotesis alternatif: nilai d-prime lebih besar dari 0

Distribusi Intensitas Sensoris

R tips and tricks

Some tips

- Learn R using R

```
install.packages("swirl")
```

- **Ctrl + Enter** on example code
- `x <- rnorm(100)` versus `(x <- rnorm(100))`
- For repetitive task

```
install.packages("usethis")
```

Some tips

- Play with `.RProfile`

```
message("Hi your_name, welcome to R!")
if(interactive()) {
  suppressMessages(require(usethis))
  try(fortunes::fortune(), silent = TRUE)
}

options(
  prompt = "indo-R > ",
  continue = "  ",
  useFancyQuotes = FALSE,
  max.print = 100
)
```

RStudio hidden gems

Outline

- RStudio project, use version control!
- Installing and updating package, hit **Tools** menu
- Using source editor (R script, Rmarkdown)
 - Use section for R script, **Ctrl + Shift + R**
 - Please name your chunks!
- Setup Global Options
 - Do not save or load **.Rdata**
 - Adjust pane layout, console to right
 - Change theme and font, e.g. **Fira Code** font family
- The friendly **Tab**
 - File navigation
 - Autocompletion
- Handy shortcuts
- Addins
 - **syler**
 - **datapasta**
 - **reprex**
 - **clipr**
 - **ggThemeAssist**
- Cheatsheets, hit **Help - Cheatsheets**

Handy shortcuts

- `Alt + -`, for assignment operator `<-`
- `Ctrl + Shift + M`, for pipe operator `%>%`
- `Ctrl + Enter`, run example on help page
- `Ctrl + Shift + [number]`, change focus
- `Ctrl + Up`, search for code history on console or editor pane
- `Alt + Up/Down`, move code to above or below
- `Alt + Shift + Up/Down`, copy code to above or below
- `Ctrl + D`, delete current line
- `Ctrl + I`, reindent code
- `Ctrl + Shift + A`, reformat code
- `Ctrl + Shift + F10`, restart R session
- `Ctrl + Alt + B`, run code up to current line
- `Ctrl + .`, find file
- `Alt + Shift + K`, shortcuts quick reference

Thanks!
